Syed Saleh Mohammad Sajid

IT Project Analyst | Frontend Developer | AI & ML Developer

+880 1775289400 | salehsajid86@gmail.com | https://www.linkedin.com/in/sezid | https://sezid.netlify.app

Projects

Exploratory Data Analysis

🌐 https://github.com/sezid/data-analysis

- Dataset preprocessed to remove unwanted noises using Pandas, Numpy
- Created various insights such as bar charts and scatter plot showing correlation between different features using Matplotlib

LIIA Smart Inc Official Website

🌐 https://www.liiasmart.com

- Integrated a communication form via Netlify to receive and store service requests and other queries
- Optimized image loading on the webpage by compressing images and adding a blur effect on images if there is a delay
- Adjusted website UI for different screen sizes using Tailwind CSS

BizBuySell

- Scraped data from BizBuySell website by extracting information such as title, asking price, cash flow, description etc.
- Used Selenium and other python libraries to write code that generate a listing to store results on a weekly basis
- Organized meetings with potential brokers to discuss company matters

Experience

IT Project Analyst   **Jan, 2025 - Present**

LIIA Smart Inc - California, USA   Remote, Full-time

- Oversaw various IT related project from software development to data analytics
- Attended client meetings to gather and analyze requirements, ensuring a clear understanding of client needs for effective project execution.
- Updated and maintained company website by utilizing web development skills
- Used knowledge of programming to extract and preprocess data from various sites to generate a listing for data analysis
- Tested deployment of website updates, ensuring smooth rollouts with minimum downtime
